DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The groups and the claims they include are as follows:

Group I, claim(s) 1-14 are drawn to a process for the enzymatic synthesis of polyol acrylates with an enzyme that transfers acrylate groups.

Group II, claim(s) 15-22, are drawn to a process for preparing polymeric polyol acrylates.

(a) An international or national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those invention involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the **CLAIMED INVENTIONS, CONSIDERED AS A WHOLE, MAKES OVER THE PRIOR ART.**

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because the invention AS CLAIMED is known in the art, see (U.S. Patent # 5240835), and thus no special technical feature unites these inventions in a category. The cited patent teaches an unsaturated ester can be converted to polymerizable monomers with a transacylase. One of ordinary skill in the art would recognize that a transacylase would transfer acyl groups from one substrate to another. One of ordinary skill in the art would recognize that acryl groups fall under the category of acyl groups.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
